Microwaves

The AEG-Electrolux microwave range offers so much more than just a quick, convenient means of cooking, reheating or defrosting food; they are engineered to combine outstanding performance with optimum user friendliness and cooking flexibility.

PERFEKT IN FORM UND FUNKTION

AEG Electrolux

Design & Performance

Optimum cooking flexibility.

Anti-fingerprint stainless steel.
Our AEG-Electrolux models are designed with anti-fingerprint stainless steel, taking the style and elegance of stainless steel one stage further - ensuring your microwave always looks good.

Space solutions.
All our microwaves are small on the outside but spacious on the inside. Our range even includes a combi microwave that has a huge 40 litre capacity without taking up any more space in the kitchen than a standard microwave.

Automatic programmes.
Cleverly devised programmes allow defrosting, cooking and combination cooking to be accomplished automatically at the touch of a button. Simply enter the weight of the food, and the microwave does the rest.

A range of cooking programmes.
Combine microwave and traditional cooking with the DUO range (with integral grill) and COMBI range (with fan and grill cooking). Traditional cooking methods can be used independently or with the microwave function for maximum time saving.

Microwave power levels.
A choice of 1000W, 900W or 800W are available within the AEG-Electrolux range. The levels are adjustable, dependant on the type of cooking.

Combi microwave.
Combine the microwave with the browning and crisping effect of grilling or fan cooking, giving you speed and fantastic results.

Quartz grill.
Fast heat up time, with a smooth surface for easy cleaning.

True fan cooking & microwave.
Combination microwave - the fan cooking with microwave, for golden brown food cooked in about half the time.

Quick start control.
Enables you to cook for 30 seconds at full power at the touch of a single button, ideal for common tasks such as warming up drinks. Can be pressed up to 5 times continuously for convenience.

More/less time option.
For use with auto cook or defrost programmes. A simple button enables you to add more or less time to the cooking or defrosting time depending on the desired results, for example to cook medium or rare steak.

Glass turntables.
All microwaves have glass turntables to ensure even cooking, and an option to use without, if baking with a large dish.

Installation.
All AEG-Electrolux Microwaves are fully built-in so no building-in kits are required, giving easy installation and a perfect fit.

The Combi Microwave comes with a choice of installation positions and can be built in under counter as well as incolumn, offering the flexibility to fit into your kitchen design. All other models should be built incolumn and 60cm models can be built over an oven or refrigerator. The 17 litre models are available in a choice of 50cm or 60cm wide versions for installation in a ventilated aperture 30cm deep.

Huge 38 litre capacity.

MCC3880EM

38 litre, fully built-in combi microwave.

- Anti-fingerprint stainless steel
- 5 power levels
- 1000W microwave
- 38 litre capacity
- Combi microwave and grill cooking
- Combi microwave and fan cooking

FEATURES
Fan cooking with temperatures from 40°C to 200°C
